Phaidra has arisen from the cooperation between the Computer Centre of the University of Vienna, the University Library of Vienna and the Centre for Teaching and Learning.

Phaidra stands for reliable long-term archiving and gives educational, research- and management staff, the possibility to publish, to store digital data and resources and to archive them indefinitely.
[Phaidra] – To make sure digital objects can be located, rendered, used and understood in the future

Maintaining information over the long term

The Strengths of [Phaidra]
