Handwritten text at the top of the page, appearing as a list or index of items, possibly names or titles, arranged in several columns.

Handwritten text in the middle section, including a prominent heading that reads "List of names" and several lines of entries below it.

Handwritten text at the bottom of the page, including a heading that reads "List of names" and several lines of entries below it.

Handwritten text at the top of the page, possibly a title or header, written in a cursive script. The text is partially obscured by a dark smudge on the right side.

**A**Vreus hic liber est : non est precioſior ulla  
Gēna kalendario : quod docet iſtud opus.

Aureus hic numerus : lune : ſoliſq; labores  
Monſtrantur facile : cunq̄taq; ſigna poli :  
Quoq; ſub hoc libro terre per longa regantur  
Tempora : quiſq; dies : menſis : & annus erit .  
Scitur in iſtanti quecunq; ſit hora diei .  
Hunc emat aſtologus qui uelit eſſe cito .  
Hoc Ioannes opus regio de monte probatum  
Compoſuit : tota notus in italia .  
Quod ueneta impreſſum fuit in tellure per illos  
Inferius quorum nomina picta loco .

## DE AVREO NUMERO

Vreū numerū cuiusvis anni sic iuenies. Vide quotus sit annus ppositus a primo āno Christi domini. quem numerū si offendes ī tabella hic apposita: aureus numerus est. 13. Si non: numero proximo minori illic expresso da. 13: sequenti. 14: & iterum succedenti. 15. sicq; deinceps donec pducetis ad numerū anni propositi. hoc est: singulis annis singulos aureos numeros accommoda incipiendo ab anno qui apparet in tabella: & a. 13. primo scilicet in serie aurei numeri subscripta. Nam ubi annus tuus sedem inueniet: illic habebis aureū numerū quesitum. Sub quo etiam continuo clausi festorum mobilium communis apparebit.

13	14	15	16	17	18	19	1	2	3	4	5	6	7	8	9	10	11	12
14	33	22	11	30	19	38	26	15	34	23	12	31	20	39	28	17	36	25

## DE CYCLO SOLARI ET LITTERA DOMINICALI.

Vmerus cycli solaris simili computo deprehenditur p suam tabellam hic positam. Nam si numerus anni propositi scriptus est ī ea tabella: cycli solaris numerus est. 28. Si non est illic expressus: da proximo minori ibidem scripto. 28: sequenti. 1: ac rursus succedenti. 2. sicq; deinceps quemadmodū de aureo numero precipiebat: donec ad annū propositum peruenies. Nam ubi talis annotū supputatio desinet: illic in serie cycli solaris subscripta numerū cycli solaris quesitum agnosces. Sub eo autem numero cycli solaris continuo habebis litterā dominicalem anni tui. que si unica occurrat: annū esse communē intelliges. si duplex: bissextilem. Prior id est superior ad festū usq; Matthie apostoli utilis erit. Inferior autē ad reliquam anni partem accommodabitur.

## DE INDITIONE

Orro ut breuiter res uulgatas pcurramus haud diffi-  
 militer colliget numerus cycli indictionalis assumpta  
 presenti tabella annorū Christi domini: quorū unus  
 quisq; habet. 8 : id est: cycli indictionalis octauus est.  
 Ceteri autē anni in tabella nō apparentes secundū inditionis seriem hic  
 subiunctam distributi suos quiq; numeros inuenient.

## DE INTERVALLO ET FESTIS MOBILIBVS

Interuallum carnis priuiale festaq; mobilia quolibet anno sic fa-  
 cile dignosces. Animaduerte aureū numerū anni ppositi ī pri-  
 mo ordine tabule festorum mobiliū. sub quo ī sequenti ordine  
 uidelicet litterarū dominicaliū accipe litteram dominicalē anni  
 tui proximo occurrentē. que erit index omniū p hanc tabulam promissorū. Nam  
 ī uersu qui ab ea littera dominicali dextrorsum porrigitur primo uidebis interual-  
 lum: id est tempus a natali saluatoris nostri ad dominicam qua cantat Esto mihi.  
 deinde diem septuagesimę & cetera quecunq; fronti tabule inscripta sunt. Sed in-  
 teruallum duos habet ordines: quorū prior docet hebdomadas integras. posterior  
 autem concurrentes si qui anno quopiam fuerint: id est dies septenario pauciores  
 qui septimanis integris adnumerant. quos quidem accedere oportet quotiens na-  
 talis Christi domini preter diem dominicam agit. Itaq; interuallum carnis priuiale  
 semper duorum annorū pars est: appellationē sumens a posteriori: quoniam ī eo  
 finem habet: quāuis cōcurrentes sint anni prioris: dies scilicet a natali ad dominicam  
 proximo sequentem quādo natalis ipse alia q̄ dominica die peragit. Quamobrem  
 recte precipit in anno bissextili quom duplex sit littera dominicalis hebdomadas  
 quidem integras per posteriorem: cōcurrentes uero p priorem queri debere. Nec  
 temere iussimus sub aureo numero litterā dominicalem in suo ordine accipi. Nam  
 si aliquando littera dominicalis e directo aurei numeri appareat: ea non erit cōue-  
 niens nuncia festorum mobilium. sed ad sequentem proximo descendendum est.

Sic enim: quod patribus placuit: nunq̄ pascalis celebritas cum hebraica coincidet obstinatione: modo pascalis comput⁹ rite tractet. Est & alia uia iueniendi quinque festa mobilia quorum clauis in kalendario posite sunt: ad hunc modum. Quot sunt unitates in clauis festorum mobilium communi superius per aureum numerum inuentę: tot dies computa in kalendario a loco clauis cuiuscunq; festi mobilis. Postremus enim dies uocatur terminus festi quesiti. Ipsum autē festum peragi solet dominica die que proximo succedit. Verū in anno bissextili cautelis quibusdam opus est. Tunc enim non solum concurrentes sed & septuagesima ac quadragesima per priorem litteram dominicalem accipi debent. reliqua uero omnia per posteriorem. Attamen quadragesima retrahenda erit per diem unum si iuxta hanc cautelam ad uigesimam quartam diem Februarii aut post eam puenerit. Quod si per clauem libeat inuestigare memorata festa: clauis ipsi addenda est unitas quotiens in anno bissextili septuagesima aut quadragesima querit retrahenda item quadragesima per unum diem si in uigesima quarta Februarii aut post eam inuenta fuerit.

. Sequitur tabula festorum mobilium .

DE CONIUNCTIONIBVS AC OP-  
POSITIONIBVS LVMINARIVM.

Oniunctiones atq; oppositiones luminarium uere haud diffi-  
culter deprehenduntur preambulis quibusdam prius expositis.  
Vnusquisq; igitur duodecim mensium anni duas habet partes aut  
facies: quarum dextra quidem ad calendarium attinet: Eius primus  
ordo habet numerum dierum mensis cuiuslibet qui. 31. nusquam superat. Sequens ordo  
septenis constat litteris: quarum quolibet ad certam septimanam diem refertur. & que ad  
dominica spectat diem littera dominicalis uulgo nuncupatur. Succedunt item triplices  
numeri nonarum: iduum atque calendarum. Cuiuslibet nempe mensis dies trifariam  
distinguntur in kalendas uidelicet nonas & idus ita ut primi singulorum mensium  
dies kalende nuncupentur: sequentibus quaternis aut senis quandoque diebus qui  
dicuntur nonae. item octonis in quolibet mense idibus. dies autem reliqui omnes ka-  
lende numerate uocantur: numeris tamen earum que precedentium appellationum con-  
tinue decrescentibus. Quis autem kalende initiales nonae item atque idus a mense in  
quo scribuntur denominationem sumant: kalende tamen numerate ad sequentem  
referuntur mensis. quamobrem & iuxta supremam earum nomen mensis succe-  
dentis adnotatur. Deinde occurrit nomina sanctorum quorundam quibus dies  
mensium dicati sunt. Postremo loco sunt tres columnule numerorum binis distincte  
lineis. quarum prima est Solis ueluti inscriptio admonet. cuius priores quidem uume-  
ri gradus integros ueri motus Solis: posteriores autem minutias graduum continent.  
Suntque gradus illi atque minutie eius signi quod proxime supra scribitur. Reliquas  
duas columnulas luna sibi uendicat. quarum utraque duplices habet numeros: prioribus  
quidem signa: posterioribus autem gradus significantibus. Sinistra denique facies  
post numerum dierum atramento scriptum sex habet columnas quinque uacuis inter-  
stitiis sepatas. quarum unaqueque triplici numerorum constat ordine non quidem continue  
ubi que sed saltim nonnunquam succedentium. Primus ordo habet aureum numerum rubro  
scriptum. secundus horas: tertius minuta horarum complectitur. Hae columnae tribus  
cyclis decemoualibus accommodantur: quorum uidelicet quouis decemouo annos continet.  
Primus initium sumit ab anno Christi domini. 1475. secundus ab anno. 1494. & tertius  
anno. 1513. quos etiam annos numeri sui supra binas columnas positi representant.  
Horum autem cyclorum cuiuslibet duae ex predictis sex columnis adaptantur.

Prior cuiuslibet cycli columna coniunctionibus: posterior autē oppositionibus luminariū ueris inseruit ueluti inscriptiones quę sunt ī capitibus columnarū admonent. Quando itaq; libet scire tempus coniūctionis uetę luminariū mense quo piā usuali quęre autē numerū anni propositi in columna coniūctionū cycli currentis (currentem uocam⁹ in quo annus ppositus cōtinet) & e directo ipsius a dextris quidem uidebis horas & minutias si quę sint: a sinistris autem in extremo ordine numerum diei a cuius meridie computari debent. horę cū minutijs prius acceptę: quibus exactis fit talis coniūctio. Q; si uelis diem huiusmodi insigni quadam appellatione pronūciare quęre numerū eius in primo ordine kalendarij. Iuxta enim apparebit quota sit septimanę dies aut cui celebritati dicata uicinaue sit. Non aliter inuenies tempus oppositionis uetę si aureū numerum in columna oppositionum animaduertas. Sed hęc quidē simpliciter accipienda sunt sicuti monuimus si a minutis non prominet gnomunculus aliquis: id est signū quoddam huiusmodi  $\perp$  siue sursum uergat siue deorsum. Nam si tale signū apparuerit ī interstitio columnarū: horę dudum acceptę ad alium diem trahunt eum scilicet iuxta quem desinit huiuscemodi gnomunculus. Verbigratia coniūctio quę in tertio cyclo notat iuxta uigesimam secundam Ianuarij diem ad uigesimā primam eiusdem attinet: hoc est: horę. 15. cū minutis. 18. non a meridie uigesime secundę diei quam indicat aureus numerus. 17: sed a meridie uigesime primę sūt numerandę: quoniā gnomūculus sursum porrectus illic desinit. Sic oppositio secundi cycli quę iuxta nonam diem Septembris scribitur ad octauam retorquet. & quę iuxta octauā ponit ad septimā reduci debet. Pari ratione oppositio tertij cycli quę contra. 23. diem Nouembris statuitur ad. 25. eiusdem spectat gnomunculo illic ad tertiū descendente uersum. Item coniūctio primi cycli iuxta tertiam Decembris diem apparens ad secundam eiusdem: & quę secundę diei adscribit ad primā attinet gnomūculis illic duobus quemadmodum in Septembri coherentibus. Sic autem numeros quosdam alienis sistere sedibus ratio opificij cogebat. Verū omnem hanc supputationem horarum cum minutijs suis ad meridianū oppidi nurembergensis referri uoluimus q̄ locus ille dignus uidebatur quem nouo litteratū genere celebraremus. Hoc etiam accedente q̄ in ea habitatione nostra pręsens opusculū condidimus. Nec tamen idcirco

alios quosuis locos usu kalendarij nostri fraudauimus : sed ipsum quasi munus cō-  
mune toti ferme Europe impartiuimus subiūcta regionū tabula que docet quantū  
quiuis alius locus numeris scriptis addere debeat aut detrahere . Nanq; in ea post  
ordinem prouinciātū ac ciuitatum insigniorum ad sinistram eunti mox alterutra  
litteratum m & a occurrit. m. quidem significans q̄ numerus sequens minui debet  
a tempore per aureū numerū superius accepto. a. uero q̄ talis numerus addi debet  
siue habeat horam aliquam cū minutis : siue tantūmodo minuta. Prior enim ordo  
columnulę litteras m & a sequentis horariam habet inscriptionem. posterior autē  
minutias exhibet. Facta igit̄ additione aut minutione prout nota occurrens admo-  
net : habebitur tempus coniūctionis aut oppositionis uerę ad locum propositum  
ac si omnis supputatio ad meridianū eiusdē loci directā foret . Scribere autē omnia  
loca que nostra tempestate habitantur ī mensum erat. quocirca paucas insigniores  
habitationes exarauimus. que uero in uicinia singularum iacent ad scriptas tanquā  
primarias reducent̄ : pauxillo quopiam interuallo nullam differētiā notatu dignā  
importante. Porro ut simul uniuersū huius tabule tenorem interpretemur : po-  
stremus ordo simplex ostendit quot gradibus polus mundi aquilonius supra hori-  
zontem cuiusuis loci adnotati extollitur. Is autē numerus quemadmodū usueniat  
inferius aperietur .

## DE ECLIPSIBVS LVMINARIVM.

Clipsis Solis aut Lune omni eo anno futura est cuius numerus a primo anno Christi domini ceptus i capite cuiuspiam columnę eclipsisalis apparet. Tempus autē eclipsis numero succedenti deprehenditur tribus constante particulis sepatim scriptis : quarū prima diem mensis qui mox etiam subiungitur ostendit. secunda horas. tertia minutias : quibus a meridie talis diei computatis mediū eclipsis euenit. Sequit̄ dimidia duratio que duplici plerūq; constat numero hore uidelicet unius ac minorū. nōnunquā uero minutis dūtaxat contenta est. Vocamus autē dimidiam durationē id tempus quod est ab initio eclipsis usq; ad medium eius : aut ab eo medio usq; ad finem. Quapropter si talis dimidia duratio a medio eclipsis demat̄ : restabit initium eclipsis. eademq; ad mediū eclipsis apposita finē eclipsis cōmonstrabit. Postremo si qua eclipsis particularis fuerit puncta eius adnotantur : id est quot duodecime ex diametro luminaris deficientis occultabūt. Que res etiā figuratiue haud in cōmoda representatur. Nam quanta pars circuli luminare significantis atramento tincta est : tantam ex superficie ipsius luminaris nobis obuersa defecturā esse pronūciabis : situ etiam deficientis partis innotescente. Inferior quippe luminaris pars deficit si inferior pars circuli nigella sit. superior autē si superior circuli portio atra fuerit. Eclipsim uero uniuersalē circulus omnino niger significat. Sed hoc quoq; spectat tabula regionū si aliubi q̄ in oppido nurembergensi degas. Quantū enim superius addidisti tempori coniūctionis uel oppositionis uere aut ab eo detraxisti : tantū hic quoq; ad mediū eclipsis adde aut ex eo minue. put nota. a. uel. m. in tabula regionū appatens admonet.

## DE LOCO SOLIS VERO.

Erum Solis locū hoc pacto cognosces. Intra tabulam Solis subscriptam cum numero anni propositi. & quod iuxta eum appareret adde ei numero qui scribit̄ in colūnula Solis ad diem propositam : priorem uidelicet numerū priori. & posteriorē qui est minorū posteriori. At si summa minorum ultra. 60. euaserit : pro. 60. ablati adde gradum unū : reliquis in loco suo dimissis. Verū in anno cōmuni post diem sancti Matthei apostoli usq; ad finem anni facta additione huiuscemodi demendus est gradus unus. Quod enim relinquetur ostendet uerum locum Solis in gradibus & minutis ad meridiem diei propositę. Quantum autem addi uel minui oporteat propter meridianorū differentiam quoniā illud pexiguū est consulto pretemmus.

## DE LOCIS SOLIS VERO

## DE LOCO LVNAE VERO.

Ocus lunę uerus facile deprehendet si prius instrumēti lunaris partes dignoscenť. Est itaq; in eo instrumento ꝑodiacus duodecim signorū suis caracteribus distinctorum. Signa trigenos habent gradus. hic autē urgente loci angustia unūquodq; spatiolū duos representat gradus. Intra ꝑodiacum est equator Lunę numeros ab uno ad sex ultro citroq; gestans. Ad sunt etiam duę rotulę mobiles duobus numeris lunaribus in kalendario positis respondentes : duobusq; qui ī tabula radicum lunę iuxta numeros annorū scribuntur. quorū prior signa : posterior autem gradus representat. His cognitis statuendę sunt radices lunę ut semel inuentę per totum quęuis annū in promptu sint. Intra itaq; tabulam radicū lunę cum numero anni ꝑpositi : & numerū lunę priorem qui signis & gradibus constat computa ī ꝑodiaco ab ariete ubi crux est incipiendo : ita ut aries habeat. 1 : taurus. 2 : gemini. 3 : & sic deinceps. ubi autē numerus ille desinet pone filum instrumēti : rotulamq; maiorē uolue donec caput eius : id est crux sub filo iaceat. & ita manentem rotulam fige intrinsecus cū cera. talis enim erit situs eius per totū annū . Similiter posteriori numero secundū signa ꝑodiaci computato : filoq; ad finem talis numeri traducto uolue rotulam minorem donec caput eius filo occultetur : in eoq; situ fige rotulam ut per totū annū illic maneat. Quotiens itaq; locū lunę in ꝑodiaco scire cupis numerū lunę priorem qui in kalendario ad diem ꝑpositam scriptus est computa a capite maioris rotulę : ad finemq; eius pone filum instrumēti. mox enim sub ipso filo habebit in ꝑodiaco locus lunę medius. Vnde & uerus continuo emerget si numerū lunę posteriorē in kalendario positum computaueris a capite minoris rotulę. nam sub filo ad exitum talis numeri translato in equatore lunę offerentur gradus addendi ad mediū lunę locum supra inuentū si in inferiori semicirculo equatoris accipiant. aut minuendi ab eodem si in superiori. Semicirculos autem noto eos qui iuxta arietem ac libram incipiunt desinuntq; . Verū in anno bissextili a festo sancti Mattheę apostoli usq; ad exitum anni utriq; numero lunari gradus. 13 .superaddi oportebit .

**PISCES** quoq; indifferentes sunt frigidi humidi & aquatici: pedesq; in tutela recipiunt. Illud autẽ nõ est obliuione pretereundũ q̃ et si luna in signo quopiam fuerit ad minutionem sanguinis electo: non tamen attingi debet pars corporis eidem signo allegata. Preterea iuuentuti quidem luna crescens: senibus autem decrescens eligi consuevit.

## DE MAGNITVDINE DIEI.

D quantitate diei ubiuis agnoscendā propria exposita est tabula : in cuius fronte numeri quidam statuunt̄ eleuationē poli borealis significantes. in lateribus antē extremis signa zodiaci cū ternis gradibus suis adiacent. Illic ergo ad quāuis diem accipe signū & gradum solis. Nam e directo ipsius sub numero eleuationis polaris apparebit quantitas temporis semidiurni in horis & minutis suis si sol ī aliquo signorū borealiū fuerit. aut quantitas temporis seminocturni si in australi quopiā extiterit. quod temp<sup>9</sup> seminocturnū ex. 12. horis ablatum relinquit quantitate temporis semidiurni. Ea autē quantitate duplicata totum tempus diurnū conflabit. Quum autem dies cum nocte sua simul uiginti quattuor horis constent : si quantitatē diei ex uiginti quattuor horis demas : quantitas noctis relinquetur. Q̄ si gradus solis nō appareat in alterutro extremorū ordinū : considerabis duos iuxta eum uiciniores. Nam penes situm eius ad illos p̄portionaliter coniectabis quantitatē temporis semidiurni mediā quodāmodo inter duas quantitates dietū duobus illis uicinioribus gradibus respondentes. Porro semidiurni temporis quantitas indicat qua hora sol occidit : sicut & seminocturnum tempus ortum solis declarat. Vt autē signorū caracteres agnoscas hic appōsita est tabella : ostendens etiā quę borealia quęue australia nūcupentur.

DE HOROLOGIO  
HORIZONTALI.

Orologium horiçontale in quavis habitatione hoc modo conficietur. Distensis pedibus circini ad latus quadrantis horologij horiçontalis i planicie quadam circulum describe. cuius diametro designata alterum semicircularū spatij horarij designādis accōmoda. Eius itaq; semicirculi arcum diuide per mediū : & a puncto medię incisionis ad centrū circuli duc lineam rectā : quę erit horę duodecimę. diameter autē circuli dudum lineata duplici horę sextę uidelicet antemeridianę & postmeridianę inseruiet. Quę res ut definitius exponi possit : arcū semicirculi oppone pectori tuo ita ut linea horę duodecimę aduersus te porrigat. Sic ergo diametro circuli in duas semidiametros resoluta : dextra quidē semidiameter horam sextā antemeridianam representabit. sinistra autē sextam postmeridianam. Reliquas autē horarū lineas hoc pacto inscribes. Pone filum quadrantis ad scalam latitudinum & moue indicem : id est nodulum filo adherentem ad eleuationem poli in scala signatam. Deinde translato indice ad lineam horę primę habebis i arcu quadrantis extremo inter filum extensum & latus sinistrum quadrantis distantiam unius horę a meridie. quam distantiam circino acceptā traduc ad semicirculū horologij futuri figendo scilicet alterū pedem circini i extremo puncto lineę horę duodecimę : alterius autem circūducti utrinq; uestigium nota in arcu semicirculi. duoq; puncta sic facta cum centro horologij continua per duas rectas : quarū dextra quidem undecimam horam significabit : sinistra autē primā post meridiem. Rursus pone indicem ad lineam horę secunde : & habebis distantiam duarū horarum a meridie inter filum extensum latusq; quadrantis. Hanc distantia transfer sicut antea ad circūferentiam horologij. factisq; duobus punctis : ac ipsis cum centro horologij copulatis : dextra quidē linea erit horę decimę : sinistra autē horę secunde. Nō aliter efficies reliquas horologij lineas posito indice sup ceteras horarū lineas i quadrante. Ad hūc modū semicirculus horologij duodecim horarū spatij distinguit. Quum autē dies estiu

pluribꝫ q̄ duodenis cōstent horis: reliquas horarū distantias hac uia deprehendes. Quanta est intercapedo quintę & sextę horarum in circūferentia horologij: tantū officio circini adiunge utriqꝫ horę sextę; factisqꝫ per pedem circini uagum duobus punctis: ac eis cū centro per lineas rectas copulatis: dextra quidem horam quintā antemeridianā: sinistra uero septimā postmeridianā representabit. Item sumpta similiter intercapedine duarū horarū quartę sextęqꝫ: ac ea utriqꝫ ad horam sextā adiuncta: si ut prius duas rectas duxeris: dextra quidem horam quartā antemeridianam: sinistra octauam postmeridianam cōmonstrabit. Ceterū descriptis iam lineis horarijs pone filum quadrantis ad numerum eleuationis poli in habitatione tua: qui per tabulam regionū deprehenditur. mox enim apparebit angulus quidā filo ipso & latere quadrantis graduato contentus. cui equalem fac ex tabula lignea aut ex lamina ferrea. eumqꝫ angulū ad lineā horę duodecime sic applica ut cuspis eius cum centro horologij cōueniat. superficies autem anguli rectissime innitatur planicie horologij neutrorū uidelicet declinans. Poteris etiā si libeat ex centro horologij educere filum ferreū secundū quantitatem anguli memorati. eritqꝫ usus eius idem cum usu anguli: utriusqꝫ umbra horas indicante. Hactenus de fabrica. nunc de positione horologij tractandum. que hand cōmode sine linea meridiana comparatē. Est autē uulgaris lineę meridiane inuentio ad hūc fere modū. In plano ad equidistantiam horizontis posito describe circulum quantūlibet. in cuius centro fige stilū teretem sic ut cacumen eius quaquauersum equaliter distet a circūferentia circuli. Ea autem longitudine sit stilus ut umbra eius breuissima que sit i meridie intra circulū terminet. Obserua itaqꝫ duas stili umbras equales antemeridianā & postmeridianam: quatum uidelicet utraqꝫ ad circūferentiam circuli desinat: factisqꝫ duobus punctis ad terminos umbrarū arcus interceptus per equa diuidat: punctusqꝫ medię incisionis cum centro circuli copuletur: que quantūcunqꝫ etiam utriqꝫ extensa erit linea meridiana quam querebas. Cui iam supimponē lineam horę duodecime horologij ita ut semicirculus horarius ad septentriones spectet: Sole itaqꝫ radiante umbra anguli supra memoratū aut filii ferrei horas indicabit.

Poteris autem ex una linea meridiana q̄ facillime in numeras alias elicere. Nam in ipso puncto horę duodecimę ubiq̄ p̄pendiculū ex manu demiseris : si in umbra fili duo puncta ubilibet sumpta p̄ rectā copulaueris : ea noua erit linea meridiana. Punctū autē horę duodecimę minister tuus ad horologiū adstans tibi q̄uis absenti pronuntiabit.

Sequit̄ de noticia horarū equinoctialiū.

## DE NOTICIA HORARVM AEQVINOCTIALIVM

Er quadratū horariū huic libello insertū horas dietū in quavis habitatione facile discernes si prius officia partium instrumenti perspexeris. Est itaq; scala latitudinum cancellatis strata lineis quarū quę inuicem equidistant eleuationes poli definiunt: numeris suis ad dextram adnotatis. quę uero ad angustiam descendūt quasi cōcursum petentes signa zodiaci denosq; eorū gradus distinguūt: litteris signorū initialibus opportune subnotatis. Discretionis autem gratia quęlibet equidistantium uocetur zodiacus habitationis. quoniam unaquęq; earum ī signa gradusq; secta est p̄ lineas inclinatas deorsum uenientes. Sub hac scala est numerus horarū duplex: antemeridianus quidē superior. postmeridianus autē inferior: iuxta suā quicq; horarium lineam. Extremerg autē lineę uidelicet horę duodecime adiacet scala breuibus quibusdā distincta spatiosis: quorū singula denos gradus representant. gradus in quā signorū quę iuxta etiam litteris suis primarijs adscribunt. Talem autem signorum graduūq; contextū haud iniuria zodiacū meridiei quispiam appellauerit. Predictis lineis sup̄incumbit brachiolum quoddam mobile. ex cuius fine quę uocet manus demissum est perpendicularum: cuius filo adheret nodulus quidam horarū index. Porro in suprema linea instrumenti aut e directo eius ad sinistram figendum est aliquid quod umbram iaciat soli oppositum. quale poterit esse granū cereū uel nodulus aut aliquid huiusmodi. In quacunq; igitur habitatione fueris diligenter animaduerte zodiacū tuū. nam ī eo semper manus predicta ultro citroq; decurret. Eam ergo manū pone ad gradum solis ī zodiaco habitationis tue. filoq; perpendiculari libere demissi ad gradū solis in zodiaco meridiei aptato transfer nodulū filo adherentem ad eundem solis gradum. Quibus sic dispositis sinistram instrumenti latius oppone solī radianti ita ut umbra cerei grani ad supremā instrumenti lineam portatur. Mox enim situs noduli inter lineas horarias quę sitam indicabit horam.

## DE HORIS TEMPORALIBVS

**M**atenus omnem horarū computū retulim⁹ ad meridianū : hoc est : uel a meridie uel a media nocte initiū supputationis fecim⁹  
 lam si libet ad horizontem referre (quoniam pleriq; mos est ab  
 occasu solis horas computare : nōnulli etiā ab oriente sole hor-  
 ris diurnis initiū facere consueuerūt) ad occasum hoc modo reduces horas a meri-  
 die coeptas. Subtrabe tempus semidiurnū ex numero horarū a meridie incipientiū  
 superadditis uigintiquattuor horis si alias subtractio fieri nequeat. Si uero a media  
 nocte fuerint computate : deme semidiurnū duodecim horis supadditis. Sic enim  
 relinquetur numerus horarū a principio noctis computandarum. Ad ortū autem  
 rediges horas a medio noctis exortās si ex eis tempus seminocturnū detraxeris cū  
 supplemēto etiā uigintiquattuor horarū si aliqui detractio fieri nō possit. A me-  
 ridie uero incipientium subtrabe seminocturnū duodecim superadditis horis. Et  
 haecenus quidē omnia de horis equinoctialibus quas uulgo equales uocant accipi-  
 enda sunt. Eas autē facile cōuertes in horas tēporales quę & inēquales hodie nūc-  
 pantur si usum instrumenti ad hanc rem expositi addiscas. Pone igit̃ filum instru-  
 menti sup̃ numerū temporis semidiurni in limbo deprehensum : & promoue no-  
 dulum ad arcum horę duodecime. Deinde transfer filum ī eodem limbo ad horas  
 equinoctiales propositas : sed a meridiano hac uel illac : id est ad orientem uersus  
 uel occidentē prout res admonet computatas. Mox enim inter arcus horarios horā  
 temporalem nodulus indicabit. Verū cū duplex illic numerorū series appareat :  
 superior quidē ab .1. ad .6. antemeridianis horis debetur : inferior autē a .7. ad .12.  
 postmeridianis. Erunt autē horę temporales antemeridianę si equinoctiales ante-  
 meridianę fuerint. & si has postmeridianas supposueris : ille quoq; postmeridianę  
 erunt. Non aliter de horis nocturnis te expedies si filo ad tempus seminocturnū  
 posito nodulum ut antea ad arcum horę duodecime perduxeris : horasq; equinocti-  
 ales propositas a medio noctis hac uel illac computaueris. Hę sunt horę quibus  
 prisci utebantur qui dies quoscunq; ac etiā noctes duodenis horis constituebant.  
 Sed & eas horas gubernamento luminariū ac planetarū distribuēbant incipientes  
 a prima hora diei Saturni : quam Saturno ipsi sup̃remā obtinenti sedem dicauere :

secundā Ioui: tertiam Marti & sic deinceps ordine seruato tam horarū q̄ planetarū:  
nocturnas etiā horas diurnis subiungentes: ita ut percurtis uiginti quattuor horis:  
planetisq; quoties oportet repetitis uiginti quinta hora: id est prima postere diei  
quartum ex ordine planetam adsciscat. Sic prima hora sequentis diei: id est domi-  
nicę ad solem attinet. & que deinde succedūt ut prius planetis suis accomodantur.  
Sed ne in re puulgata diem teramus: si libet scire cui planetę debeatur hora quelibet  
proposita: scias i primis cuius planetę sit dies presens. Tali autē planetę ha-  
bent successione p̄ dies septenos. Saturnus. Sol. Luna. Mars. Mercurius. Iupiter.  
Venus. diem sabbati Saturno assumente: ceterisq; diebus ad ceteros planetas ex or-  
dine relatis. Quo cognito statue primā horam diei in nota interiori primi articuli  
indicis: secundam in nota secundi articuli: tertiam in nota tertij. quartam in cacu-  
mine indicis: quintam in nota exteriori tertij articuli: sextam in secundo: septimā  
in primo articulo extrinsecus. reliquas autē horas si que sint: similiter ad articulos  
sequentiu digitorū adapta. digitumq; qui horam ppositam suscipit animaduerte.  
Nam si in primo articulo talis digiti intrinsecus planetā diei sisses & sequentibus  
articulis sequentes planetas addicabis donec ad sedem horę propositę uenies: illic  
planetam horę dominū deprehendes. Hęc quantumq; sint momenti adnotasse  
nō fuerit alienū quandoquidem horarum tractatu ad hanc fere descriptionē adducti  
sumus. Quis hoc quoq; simul innotescat cur septenis diebus a septenario planetarū  
numero appellationem mutuauerit? nō seruetur planetarū ordo qualis in celo est:  
sed a Saturno uerbigratia ad Solem: a quo ad Lunam & ita deinceps binaria semp̄  
intercalatione saltus fiat. Id enim uigene quaternę horę quib; singuli dies noctesq;  
constant facta per eas planetarū distributione exigunt. Quippe hoc successu uige-  
sime quintę horę: id est exordio postere diei quartus a priori planeta duobus iam  
preteritis allegatur.

 Icalendarij nostri clauderem? usum nisi quorundā de celebra-  
tate pascale dubitatio succurreret. quę de re nō nihil ex presenti  
opusculo colligi potest. Nam quantum diuino precepto iustum sit  
pasca celebrari quartadecima die mēsis primi (primi autē men-  
sis dicitur cuius initiu aut mediū i ipso equinoctio uetno est: uel initiu uicinius eidē

equinoctio) perspicuū est huius rei obseruationem e duobus pendere principijs : equinoctio uidelicet uerno & nouilunio primo : quorum neutri stabilis perpetuo sedes concessa est ī kalendario romanensi quo ecclesia etiā christiana utit. Quippe ratio supplementi bissextilis non recte quadrat qn quattuor anni ecclesie pauxillo quodā supent quattuor annos solares. Quo fieri oportet ut si hoc anno uerbigratia equinoctium uernū fuerit ad unguem in meridie undecime diei Martij: quattuor annis usualibus exactis equinoctiū simile iam nō erit ī meridie undecime diei: sed tanto prius quantus est excessus quattuor annorū usualiū sup. quattuor annos solares. Verū huiuscemodi anticipatio paucis quidem annis admodum parua existens multorū successu annorū paulatim sensibilis redditur adeo ut a tempore Dionysij abbatis cuius pascale computo adhuc utimur: ad nostrā usq; etatē memorata equinoctij uerni anticipatio dies ferme decem cōplexa sit. Pari ratione nouilunia quoq; firmos in kalendatio locos habere nequeunt. quoniam septuagenissenis usualibus annis lunationes singule ad senas prope horas anticipāt. Quas ob res ut q̄ breuissimē dicat: quum his annis equinoctiū uernū fiat undecima Martij: quod tempore Dionysij fiebat uigesimaprīma eiusdem: si quod pleniluniū in hoc decem dierum interuallo euenerit: id pfecto pascale erit secundū institutionem primariam quāis computo Dionysij discrepāte. Qui ergo sciunt equinoctiū uernū hoc nostro tempore ad undecimā Martij fieri ( sed nemo fere ignorat quum iā pridem diui Gregorij dies uidelicet duodecima Martij eidem concessa sit equinoctio) qui deniq; in celo aut alias pleniluniū agnoscūt. quod iam puulgatū est. qui rursus diuini tenorē pcepti de celebritate pascali didicerūt: quod pene ī ppatulo est: popularib⁹ iam dudū lingua uernacula litteras legētib⁹ sacras: ij certe omnes mirari possūt cur indictū interuallū decē dierū plenilunio incidēte nō eo ipso aut saltē proxima dominica sequenti pascale fiat sacrū: sed p mensē totū & eo quādoq; amplius ecclesia iubente differat. Hinc quedā oriri solent questiuncule de luna pascale. qualis mota fuit Bessarioni cardinali dū legatū in Venetis ageret. Quales etiā mihi a multis & qbusdā hebreis sepe numero obiectate sūt. Talis deniq; ambiguitas uidet quondā sacerdotes uexasse Premenses ut pascale diē agerēt mense fere toto prius q̄ ecclesia uniuersalis celebraret: durante idcirco in hodiernū usq; diem uerbo ī eos ludifico.

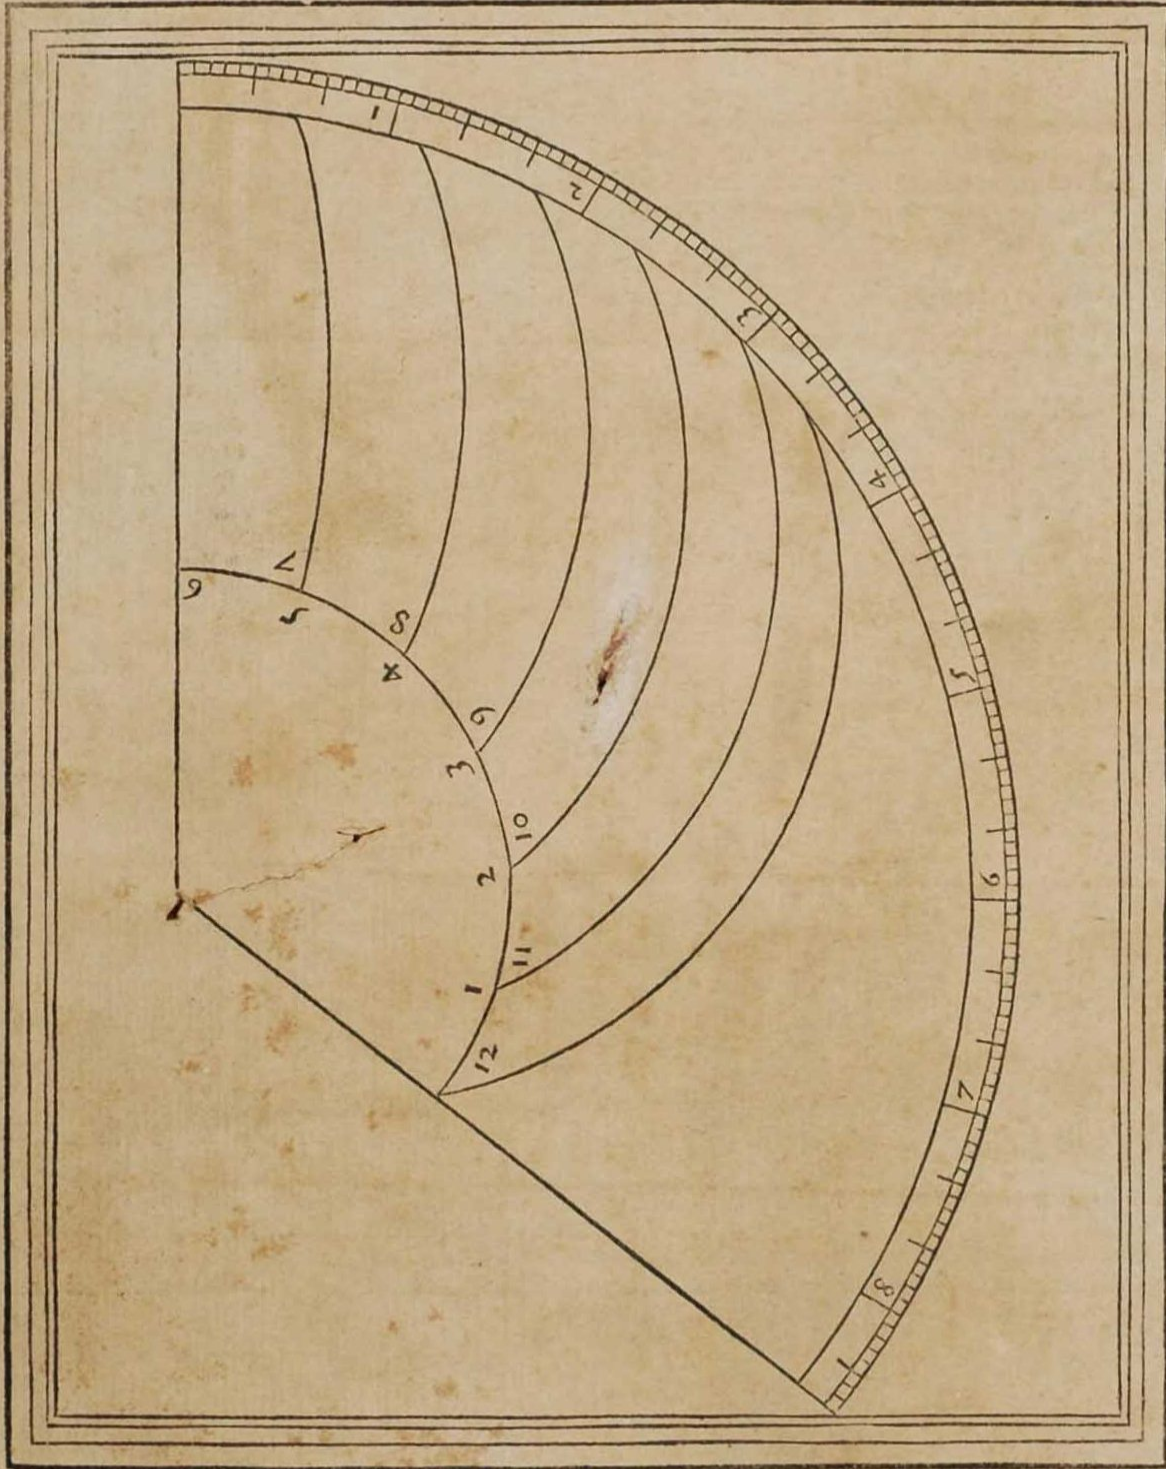

Maxima autē ac nimis pudenda est contumelia quam nobis hebraica durities: Ieruū istud pecus: inferre non erubescit: nunq̄ in nos cauillandi finem faciens: ut qui a se non minimam sacre litteraturę partem mutuati simus ne primū quidem diuine legis monumentū seruare studeamus. scilicet uel ignorantiam nobis uel inconstantiam impingens. Quam obrem opere precium est quosdam futuros proferre annos quib⁹ uera pascalis ratio discrepat a prisca illa supputatione dionysiana: quam adhuc ecclesia uniuersalis pro auctoritate sua tolerat. Hoc autem prelabor non animo reprehendendime id facturum: quando non penes arbitrium meum sita est huiuscemodi negocij precipua tractatio: sed quo cautiores fiant nostri homines si quando impia quauis obiectione uexentur. Haud enim facile est tela recutere improuisa. Iam uero tas fit huiuscemodi discrepantiam tabulari numero cōmonstrare
