(Erlass des Curatoriums- * * * * *

* * * * * ddo. 31. Jänner 1899.)

Qsum huius opusculi breuiter exponemus. In principio offert se kalendarium in .12. menses partitum. Unusquisque .12. mensium celebritates sanctorum in medio implet. Ordo primus sinistra versus habet numerum dierum mensis. Sequens ordo septembris constat litteris. quare quilibet ad certam septimane refert diem. et que dominica fuit. littera dominicalis vulgo mutatur. Succedunt item triplices numeri nonarum. yduum. et kalendarum. Cuiuslibet namque mensis dies trifariam distinguunt. in kalendas videlicet nonas et ydus. Ita ut primi singulorum mensium dies kalende vocantur. Sequentibus quateris aut semis quique diebus qui dicuntur none. Item amittantibus. 8. in quolibet mense ydibus. Dies autem reliqui omnes kalende numerate vocantur. numeris tam earum quam precedenti appellacione decreascentibus. Quauis autem kalende initiales. none item. et ydus a mense in quo scribuntur denominationem sumant. kalende tamen nunciate ad sequentem referuntur mense. **N**unc quod in dextra parte notantur discamus. Cuius sex sunt columnule lineis discrete singularibus. Quarum prima est solis. veluti inscriptio admonet. Cuius portiones quidem numeri gradus integros veri motus solis. posteriores vero minutias graduum continent. Suntque gradus illi atque minutie eius signi quod prime superscribit. Succedentes duas columnulas luna sibi vendicat. quarum utraque duplices habet numeros. portiones quidem signa. posterioribus gradus significatibus. Quarta propterea columnula motui capitis draconis adaptatur. Quinta et postrema ascendens signum eiusque gradum ad quatuor horas exponit. Cuius dextre partem columnulas impletiarum missas faciamus. Nam de his in sequentibus ametrariolis abunde dicemus. Nec de kalendario dicta sint. Nunc de ceteris.

De coniunctioibus et opposicioibus luminariu

Post kalendarium impressi sunt celi quatuor. quorum quis. 19. annos continet. primus incipit ab anno christi domini. 1477. Secundus ab anno. 1496. Tercius ab anno. 1515. Et quartus anno. 1534. Prior cuiuslibet celi columna coniunctionibus. posterior opposicioibus luminariu inseruit. ut clare inscriptioes que sunt in capitibus columnarum admonent. Quando itaque libet scire tempus coniunctionis vere luminariu. mense quopiam usuali. Quere annos saluatoris nostri. in facie sinistra celi currentis. cum hisce annis intra columnam coniunctionum sub hunc mensem cuius coniunctionem queris. et primo offert se dies in quo coniungentur luminaria. sub quo hore et minute quas horas et minutas a meridie peruenienti diei computabis. quibus exactis sit talis coniunctio. Quod si velis huiusmodi diem. insigni quadam appellacione pronuntiare. quere dierum numerum in primo ordine kalende

darit. **I**uxta em apparebit quanta sit septimane dies aut cui ce-
lebritati dicata vicina ue sit. **P**aud aliter inuenies temp⁹ oppo-
sitionis. si qd dixim⁹ in colūna oppositionū aduertat. **N**on nū
q̄ in vno mense duas aut cōiunctiones aut oppositiōes reperiri
attingit. quaz vnā colūna in se apledit. **A**lterā spaciū angustia
ad dextrā si fuerit oppositio. aut sinistram si cōiunctio reuertit.

Supputatio hec horaz cum minutis ad meridiāū oppidi
vlnensis refert. **Q**uod si ad alios quouis locos itide scire desideās
ita pficies. **Q**uoties orientē versus loci distantia. 6. miliarū ab
vlna est. toties temp⁹ cōiunctionis aut oppositiōis minutū vnu
adiicias. **D**ecidentē versus subtrahas. **M**eridiana et septentria
na distantia nil variant. **N**ec id te fugiat omibz notissimū q̄

posteriores autem decurrentes si non nulli quopiam anno fuerint. **I**n anno bissextili cautelis quibusdam opus est. Tunc enim decurrentes septuagesima et quadragesima per priorem litteram dominicales accipi solent. Reliqua vero omnia per posteriores. Illo minimo adiecto. Si quando et dominicales littere extiterint. non solum decurrentes septuagesima et quadragesima. Vex etiam hebdomadae intervalli per priorem et haud posteriores acceptent. Item in bissextili quadragesima per unum diem si in vigesima quarta februarii aut post eam inuenta fuerit retrahat.

De eclipsibus luminarium

Solis aut lune eclipsis omni eo anno ventura est. cuius nunc a primo anno saluatoris nostri incipiat in capite cuiuspiam columnule eclipsas apparet. Tempus aut eclipsis nunc succedenti deprehendit quatuor distante periculis separatim scriptis. Quare prima diem mensis primi superscripti ostendit. Secunda horas. Tercia minutias. Quarta secundas. quibus horis minutis et secundis a meridie talis diei computatis medium eclipsis euenit. Deinde puncta ecliptica nunc duplici adiuncta sunt. His non longe abest figuratio haud incommoda. Nam quanta pars circuli luminare significantis attrameto tincta est. tanta ex superficie ipsius luminaris nobis obuersa defectura esse praedicabis. Eclipsim vero uniuersalem circulus omnino niger significat. Postremo sequitur duratio integra. quae duplici plerumque constat numero. hore videlicet et minutorum. non nunquam aut minutis durat coepta est. Vocamus autem integram durationem. tempus quod est ab initio eclipsis usque ad finem eius. Quapropter si duratio talis per medium peratur. et medietas a medio eclipsis demat restabit initium eclipsis. Eademque ad medium eclipsis apposita finem eclipsis demonstrabit. Nec hoc te lateat. tres primas columnas solares. reliquas quinque lunares eclipses continere.

De magnitudine diei.

Ad quous diem accipe signum et gradum solis. Cum quibus tabulam quantitatatis dierum intra. Et signo inueto in capite tabule. Solis gradus in sinistra parte acceptandus est. Similiter signum in pede tabule versat. gradus solaris in dextra eligat. Et semper annis signum et gradus angulus. horas et minuta. quantitate diei plenitudine. aptissime ostendit. **H**ec diei longitudo ad polum Olmensis referenda est. Que tamen ad alia quis loca totius ferme Europe hoc pacto applicabit. In subiuncta tabula quere nomen habitaculis tue. si aliubi quod oppido Olmensi degas. et nunc iuxta apparens ostendit quot gradibus polus mundi aequilom super horizontem loci seu habitaculis tue extollat. Quod si polus tuus Olmensis excedit. Vide quot gradibus. Et
